

# NOVASTOR DATACENTER 5.4

## Why is DataCenter the #1 Alternative When Replacing Backup Exec?

NovaBACKUP DataCenter is centralized backup software for mixed IT environments including Windows and Linux, VMware and Hyper-V. DataCenter includes support for the latest technologies and addresses the requirements of small and medium sized IT environments regardless of hardware. The secret to DataCenter's performance and scalability - is in its distributed architecture.

### NovaStor DataCenter

### BRINGS SPEED, SCALABILITY AND STABILITY

Backup Exec	NovaStor DataCenter	
X	X	Bare Metal Recovery inc. universal restore
X	X	Support for Windows, Linux, Oracle
	X	<b>Multithreaded capabilities</b> Allows for multiple files to be backed up simultaneously. Therefore increasing speeds of backups AND restores
	X	<b>All inclusive licensing</b> All novastor licenses are fully capable for applications and file, image and virtual machine backups
X	X	<b>Hardware Agnostic</b>
	X	<b>MutiStreaming Capabilities</b> Multi Streaming like multi threading allows for multiple computers to be backed up in the same Job, Physical or virtual. This combined with MultiStreaming, makes us on average twice as fast as our nearest competitor
X	X	<b>Cluster Support</b>
	X	<b>Custom Installation and Set up</b> Novastor offer complimentary infrastructure analysis and installation to ensure our software goes in right the first time!
	X	<b>Unlimited storage servers due to our distributed architecture.</b> Any machine on your network can be a client and storage server simultaneously for no extra cost
X	X	<b>Mailbox level recovery</b>
X	X	<b>Network Backup</b>

# NOVASTOR DATACENTER

- ✓ FAST, SCALABLE NETWORK BACKUP SOFTWARE
- ✓ WINDOWS & LINUX SERVERS
- ✓ WORLD CLASS IN-HOUSE SUPPORT
- ✓ QUICK & EASY RESTORE WITH DR FOR WINDOWS & LINUX
- ✓ #1 ALTERNATIVE TO SYMANTEC / NETBACKUP / COMMVAULT

## FEATURES AND FUNCTIONALITY

- ✓ Intuitive Central Management
- ✓ Backup for Heterogeneous IT-environments (Windows / Linux)
